

Does your civil society organization need numbers?

Do you need to know if your vision of the future could work? Will save carbon?
Will be cheap or expensive?
Will impact on employment?
Will be acceptable?

Actually .. integrated systems modeling cannot tell you if your vision is acceptable, but it might help you explain why your vision of change is sensible and necessary.

To get the ball rolling, register and come along to a coordination meeting between **energy system modelers** and similar, **civil society organizations**, and the **interested public**, as follows:

- Energy Bridge Meeting
- **Saturday 18 January 2020**
- 10:00 - 17:00 followed by informal restaurant meal
- Berlin, Germany | venue to be confirmed
